

ASSOCIATE PROGRAMME

"If only I could better connect with my local multi-faith community..."

We know that the needs in every area of Great Britain & Ireland are different, but since the nations have come to live in our postcode, the ethnic and religious make-up around us can be complex and baffling. How can we bring the love of Christ to the many different peoples around us?

Interserve can help. We have over 160 years' experience in Asia and the Arab world and over 30 years of cross-cultural ministry within Great Britain. You could tap into this by becoming an 'Associate' of the Interserve Great Britain & Ireland Country Team (ISGBI).

Associates are individuals whose work or volunteer work involves ministry among peoples of Asia and the Arab world. Associates don't raise personalised support; they are not employed by ISGBI; instead, they pay a modest annual membership contribution towards the cost of the benefits received.

Benefits of being an Associate:

- Local support
- Invites to training events
- Provision of selected resources
- Prayer support
- Access to expertise and information sharing, networking and encouragement

HOW IT WORKS

The Associate link to the Country Team is not intended to compete with an individual's local involvement.

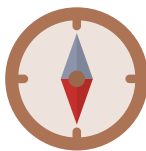

The link is intended, not only to enrich the witness of the individual, but through that person, to feedback into their local church the vision and skills involved in being a cross-culturally missional church.

The Country Team Associate works with the recognition of the local church, within mutually agreed parameters.

The Associate is at all times under the pastoral structure of their local church for accountability and encouragement.

Practical guidance, extra prayer covering and technical advice is made available within the Country Team network.

To find out more about being an Associate please contact: start@interserve.org.uk

Interserve is a leading mission enabler in Great Britain & Ireland: envisioning, equipping and enabling local churches and individual Christians.
